

VLF Cable Test

VLF hipot tester for Weshine® VLF Cable Test with CE certificate, high quality and accuracy, Invented and produced according to national standards, complete electric testing solution available. Contact us for more VLF hipot tester from Weshine!

Weshine® Pour point automatic tester for VLF Cable Test

Weshine® VLF Cable Test is a compact, robust and portable VLF sine wave test system for medium voltage cables. As an ideal tool for routine cable testing. For 0.1Hz sine wave voltage test and rectangular or DC voltage test, the test kit meets the highest requirements for test voltage quality and stability. In addition, the integrated "breakdown detection" will turn off the test voltage in the event of excessive charging current and ensure limited damage to the cable. Consistent

single-button operation combined with complex operating concepts allows rapid and targeted use of the system.

Since the VLF test provides an operating frequency of 0.1Hz instead of the 50/60Hz usually required for field transmission, the physical size of the VLF test device is greatly reduced. Crucially, the test object still receives the AC sinusoidal voltage provided by daily use, but the size of the test equipment is much smaller.

PRODUCT INFORMATION			
Product Name	VLF HIPOT TESTER FOR VLF Cable Test		
Model Number	VS-VLF	Output Frequency	0.1 Hz, 0.05 Hz, 0.02 Hz
Output Voltage	30 kV ~ 90 kV	High Test Capacity	5.5 μ F
Protection Function	Over-voltage Protection, Over-current Protection.		
Typical Application	Power Cables Below 35 kV; Generators Hipot Test.		
Certificates	CE; EMC; LVD; ISO;	Weight	4+25 kg

Weshine® VLF Cable Test Parameter (Specification)
